# A Guide for Patients Beginning Buprenorphine Treatment at Home

## Before you begin you want to feel very sick from your withdrawal symptoms

#### It should be at least . . .

- 12 hours since you used heroin/fentanyl
- 12 hours since snorted pain pills (Oxycontin)
- 16 hours since you swallowed pain pills
- 48-72 hours since you used methadone

#### You should feel at least three of these symptoms . . .

- Restlessness
- Heavy vawning
- Enlarged pupils
- Runny nose
- Body aches
- Tremors/twitching
- Chills or sweating
- Anxious or irritable
- Goose pimples
- Stomach cramps, nausea, vomiting or diarrhea

### Once you are ready, follow these instructions to start the medication

#### **DAY 1:**

#### 8-12mg of buprenorphine

Most people feel better the first day after 8-12mg. (Dosing depends on how early on the first day you started)

# Take the first dose Wait 45 minutes 45 minutes • Put the tablet or strip under your tongue

- Put the tablet or strip under your tongue
- Keep it there until fully dissolved (about 15 min.)
- . Do NOT eat or drink at this time
- Do NOT swallow the medicine

# **DAY 2:** 16mg of buprenorphine

#### Take one 16mg dose

Most people feel better with a 16mg dose

16mg

Repeat this dose until your next follow-up appointment

If you develop worsening symptoms while starting buprenorphine before your scheduled outpatient appointment return to the emergency department
